

```
public interface EmployeeDao {  
    void addEmployee(Employee e);  
}
```

```
@Repository  
public class EmployeeDaoMongoImpl implements EmployeeDao {  
    public void addEmployee(Employee e) {  
        db.collections.insert(json of e);  
    }  
}
```

①

```
- @Service
public class SampleService {
    @Autowired
    private EmployeeDao employeeDao;

    public void doTask() {
        Employee e = ...
        employeeDao.addEmployee(e);
    }
}
```
